

Gabriel Gregório

Senior Data Product Analyst

gabrielgregorio10@gmail.com | +55 11 99523 1989 | www.linkedin.com/in/gabrielgregorio | Spain

Professional Summary

Business Analytics with 8+ years of experience driving revenue growth, sales performance analytics, KPI optimization, and business intelligence initiatives across SaaS, fintech, marketplace, and consumer-focused environments. Proven expertise transforming complex business data into executive-level insights that support strategic decision-making for Sales, Product, and Operations leadership teams.

Proven track record of:

- Designing scalable Python + SQL pipelines for automated analytics and reporting
- Leading A/B testing, pricing analysis, and performance optimization initiatives
- Conducting deep root cause analysis on revenue and operational performance drivers
- Translating complex data into actionable recommendations for leadership stakeholders

Strong experience partnering cross-functionally with Sales, Product, and Business teams in high-growth, data-driven environments, with a focus on scalable reporting, performance visibility, and strategic business impact.

Core Skills

Analytics Engineering & Data Systems

Python (production pipelines) | SQL (advanced) | ETL/ELT | CI/CD | Data Modeling | Airflow | Databricks | AWS

Experimentation & Pricing Analytics

A/B Testing | Experiment Design | Causal Analysis | KPI Definition | Pricing Strategy Support

Business Impact & Strategy

Root Cause Analysis | Revenue Optimization | Stakeholder Communication | Data Storytelling

Visualization & Delivery

Tableau | Looker | Power BI | Executive Dashboards

Experience

Lead Data Analyst (Global Wellness Platform)

Wellhub — Remote (Brazil)

12/2024 – 04/2026

- Designed and deployed production-grade Python pipelines to automate analysis of user behavior and operational signals, reducing manual analysis cycles and enabling near real-time decision-making
- Built a sentiment classification system (NLP pipeline) to identify operational failures and partner compliance risks, directly influencing marketplace quality and retention strategy
- Developed scalable KPI frameworks and dashboards used by Account Management and leadership, reducing ad hoc analysis demand by 50%
- Created new business-critical metrics (e.g., proximity-based engagement indicators) that improved partner negotiations and conversion rates

Impact: Transformed fragmented analytics into scalable, decision-ready systems supporting a global digital health ecosystem

Lead Data Analyst (Credit & Risk / Pricing & Strategy)

Natura | São Paulo, Brazil (Hybrid)

07/2023 – 12/2024

- Built end-to-end experimentation frameworks (A/B testing) to evaluate pricing, credit, and commercial strategies across regions
- Conducted deep root cause analysis on revenue and performance variations, guiding decisions on scaling,

adjusting, or discontinuing initiatives

- Designed SQL-based data models and pipelines as a single source of truth for strategic decision-making
- Led seller segmentation and behavioral analysis, identifying high-growth cohorts and designing targeted interventions

Key Achievement:

- Increased sales by **800%** through data-driven segmentation + continuous performance experimentation
- Improved retention from **30% → 90%+** via iterative testing and strategy optimization

Senior Data Analyst (First Data Hire)

Startup Fanbase | Campinas, Brazil (Hybrid)

10/2022 – 07/2023

- Architected the company's **entire analytics layer**, migrating from ad hoc reporting to structured BI (Looker)
- Built **100+ data transformation procedures**, structuring raw → curated → analytics-ready datasets
- Developed **automated Python pipelines** for recurring analysis and reporting, saving 2 full workdays per cycle
- Enabled clients to transition from descriptive analytics to **actionable insights and performance tracking**

Mid-Level Data Analyst (Experimentation Focus)

Itaú — Remote (Brazil)

04/2022 – 04/2023

- Designed and analyzed **A/B tests for pricing and financing strategies**
- Partnered with business stakeholders to translate experiment results into **go/no-go strategic decisions**
- Delivered **data storytelling for leadership**, connecting experiment outcomes to revenue impact

Junior Data Analyst (Fraud & Risk Analytics)

ClearSale — Remote (Brazil)

12/2019 – 04/2022

- Built **data mining models and anomaly detection workflows** to identify fraud patterns
- Structured analytical problems into **scalable SQL + Python solutions**
- Supported the evolution from reactive to **proactive fraud prevention strategies**

Business Intelligence Intern

Bradesco | Osasco, Brazil (On site)

01/2019 – 12/2019

- Conducted **A/B tests on digital collection strategies**
- Supported credit recovery analytics through data exploration and reporting

Education

Specialization in Complex Data Mining UNICAMP (University of Campinas) | 2025

Postgraduate in Data Science and Big Data PUC MINAS (Pontifical Catholic University of Minas Gerais) | 2023

Bachelor of Science in Electrical Engineering UNESP (São Paulo State University) | 2019
